SUCCESSION FINANCIAL PLANNING
Advisory Services (PTY) Ltd
Licensed Financial Services Provider PSP 41158

FUND DETAILS

Fund Category	SA Multi Asset Medium Equity
Benchmark	CPI+4%, Avg SA Multi Asset Medium Equity
Risk Profile	Moderate
Investment period	5 years or longer
Launch Date	01 August 2020
Fund Size	R 26 million
Platform	Glacier

FUND OBJECTIVE

The Real Income solution aims to provide investors with a level of income that is consistent with the associated risk of medium- to long-term investments. The preservation of capital is extremely important to ensure continued income security. The solution will use strategies that increase overall downside protection while at the same time seeking to share in upside returns. The solution may also be exposed to Retail Investment Hedge Funds, a multi-strategy alternative fund, and a smoothed bonus fund. Smoothed bonus funds declare monthly bonuses in a way that helps reduce short-term volatility. Investors in this solution have an investment horizon of five years or longer. The solution is not compliant with Regulation 28 of the Pension Funds Act, 1956.

ASSET ALLOCATION

Equity, 9.3%	International Cash, 2.0%
Property, 0.8%	International Property, 0.3%

---------------------	------	--------------------------	------

**The annual wrap fee is only applicable to those funds within the wrap portion of the solution and excludes those portfolios within a policy or segregated portfolio (e.g.: Sanlam Multi-Managed Smooth Growth and Multi-Managed Alternative Fund).

* The simulated analysis before launch date was created using Morningstar and is for illustrative purposes only. It provides an indication of hypothetical past performance given historic asset and manager allocation, and cannot be construed as providing an indication of expected future performance. The investor is liable for CGT on any transactions in the units of the underlying unit trusts within the wrap funds. Compulsory investments are not subject to CGT. Performance is calculated using net returns (after fees) of the underlying unit trusts, and quoted excluding wrap fund fees. Performance quoted is pre-tax. Fund performance numbers shown are for a notional portfolio and do not reflect the actual performance of the client invested in the wrap fund due to timing differences of investments or disinvestments of the client. Benchmark returns for CPI are based on actual published returns and an estimated one month return for the month of the report date. ASISA Benchmark returns are the ASISA returns available as at the time of reporting.

MANAGER COMMENT

October saw markets trend higher after a weaker September, as a broad market rally saw most major global indices ending the month higher, including South Africa. Despite a stronger month for markets, there remain some ongoing concerns. The inflation debate remained in the spotlight, weighing on investor sentiment, especially due to concerns that inflation will not be transitory after all. The COVID-19 Delta Plus (another variant of COVID-19) encouraged fear, especially in the UK which recorded a large increase in COVID-19 cases despite a relatively high vaccination level, with the Delta Plus variant blamed for the spread. Finally, there is a concern that increased regulations by Chinese authorities will see the country's economy deteriorate and bring the global economy down with it.

Global equity markets got back to winning ways in October, as developed equity markets recorded their best month since November last year. The MSCI World Index closed 5.59% up month-on-month (m/m) in USD and 6.68% in ZAR. US stocks were supported by a strong start to the 3Q21 earnings season, with more than 80% of companies exceeding earnings expectations, driving the S&P 500 (USD) to a new peak, closing the month 7.01% up. US energy stocks were once again standout performers in October, supported by a rally in the price of Brent crude oil. European equities also closed the month on a strong note, with the Euro Stoxx 50 (€) up 5.19%.

Emerging equity markets lagged developed market peers, as the MSCI Emerging Market Index returned 0.93% m/m in USD and 1.97% in ZAR. US-listed Chinese stocks, which lost one-third of their value in the first nine months of the year, bounced back, supported by Chinese tech giants' recovery including Tencent (around 11% m/m). Unfortunately, the strong performance was offset by a poor month from Brazilian and Turkish shares.

The South African equity market followed global markets and bounced back from September losses, closing the month with strong gains. The FTSE/JSE All Share Index closed at 5.15% m/m, with mining shares the best performers for the month, particularly metal stocks.

All major sectors finished the month in positive territory for October. Resources led the pack at 8.44% m/m, on the back of stronger commodity prices driving the share price of miners. Industrials and financials closed at 6.80% and 3.49% m/m respectively. The Industrials sector was given a boost with Naspers and Prosus delivering a solid performance (around 7.5% m/m in aggregate), following Chinese tech stocks. SA listed property lost some ground in October, closing the month at -1.69%, while cash (STeFI) delivered a moderate return of 0.32%. South African growth managers (5.81% m/m) outperformed value managers (3.64% m/m).

The ZAR continued to lose ground against the USD, closing 1.02% down m/m, in yet another rollercoaster month. Furthermore, the ZAR lost as much as 2.64% and 0.87% against the euro and sterling but managed to finish the month stronger against the Japanese yen at 2.20%.

PORTFOLIO MANAGER

Paul Wilson
BSc (Hons) Actuarial Mathematics; CFA
Charterholder

Paul joined Sanlam in 2011 as an investment analyst before being appointed to his current position of Chief Investment Officer in 2013. As CIO, Paul heads up a substantial team of experienced investment professionals in Sanlam's Multi-Management team. As solutions architects, the team performs in-depth macro and manager research that informs the portfolio construction process, which is encompassed within a disciplined framework. Sanlam's multi manager investment team has an exceptional tactical asset allocation track record, giving them a distinct competitive edge.

In his previous capacity as head of research, Paul ensured that the quality of data was high and appropriate for the investment process. His responsibilities included due diligence at a manager level, developing new analysis methods, writing articles and doing research. In his role as portfolio manager, Paul was responsible for client portfolios and making trading and investment decisions.

Before joining Sanlam, Paul fulfilled the roles of head of asset manager research and an investment consultant at Jacques Malan Consultants & Actuaries. He also gained experience as a business analyst at Monocle Solutions and a Quantitative Analyst at RisCura Solutions in 2004.

Paul is a certified Chartered Financial Analyst (CFA) and also has a BSc (Honours) in Actuarial Mathematics from the University of Pretoria.
