MANAGER COMMENT

Following a disappointing first quarter for global markets, the month of April proved no different. Most global markets ended in the "red", including South Africa on the back of myriad factors which all weighed on sentiment and left investors rattled. Such factors include the ongoing Russian invasion of Ukraine and inflationary pressures, particularly in the US. Furthermore, the strict movement restrictions in parts of China to curb recent COVID-19 infections raised supply chain shortage concerns.

Developed equity markets had a miserable month. The MSCI World Index returned -8.43% in USD and -0.89% in ZAR. In USD terms, this also marked its worst month of a bad year thus far. US equities struggled. The S&P 500 was down 8.72% m/m, its worst month since March 2020. US tech shares were amongst April's biggest losers, with the tech-heavy Nasdaq 100 index (around -13% m/m) experiencing its worst monthly drawdown since 2008. European equities fared better than US counterparts, despite April concluding with no signs of a resolution to the war in Ukraine. The Euro Stoxx 50 (€) returned -2.00% m/m. The UK's blue-chip FTSE (£) surprised on the upside, closing 0.31% m/m.

Emerging equity markets fared slightly better than developed counterparts, with the MSCI Emerging Market Index closing down 5.75% in USD and 2.02% up in ZAR. Chinese equities experienced a late-month rally as the government pledged support for economic growth, which has been hampered by severe lockdowns related to China's "Zero-COVID" policy. Despite the April drop, the Brazilian and South African equity markets remain the only two global markets in positive territory year to date, measured in USD.

The South African equity market followed global markets, ending the month in negative territory for the first time in seven months. The FTSE/JSE All Share Index closed down 3.66% m/m. The local bourse was red across the board.

All major indices recorded losses. Financials plummeted 3.42% m/m as banks and insurance companies were amongst April's worst-performing stocks. Miners have been a key driver of local market performance but were generally weaker during the month as production reports disappointed, with Resources returning -5.39% m/m. Industrials, which have lagged other sectors this year, was the best performing sector in April, at -1.80% m/m. Local bonds sold off sharply, with the All Bond Index (ALBI) returning -1.67% m/m. SA listed property struggled, at -1.41% m/m. Cash (STeFI) delivered a moderate return of 0.36% m/m. South African value managers (-2.96% m/m) outperformed growth managers (-4.38% m/m) once again, consistent with what is occurring globally as interest rates remain the key theme across key countries.

The ZAR experienced another rollercoaster of a month, dropping to its weakest level in close to five months as expectations of a 50 basis-point hike by the Fed kept the USD elevated, with the ZAR losing as much as 7.61% m/m against the USD. The ZAR also lost 3.11% and 2.56% m/m against the pound and euro respectively. On a positive note, the ZAR gained 6.74% m/m against the Japanese yen.
